

WORK HISTORY

SEP 25\2026

Name: KYI ZIN THANT

■ Career Summary

After joining the SES industry as a new graduate, I have been gaining experience mainly in software testing within a client-side environment. My responsibilities include validation testing for automotive-related systems, test execution, continuous testing support, and maintenance and improvement of testing environments and tools.

Through working with external business partners and team members, I have developed strong task prioritization, teamwork, and communication skills.

Going forward, I would like to gain experience in AI- and cloud-related product development environments where I can contribute to long-term system improvement and continue strengthening my expertise as an engineer.

■ Work History

Period	Role / Assignment	Responsibilities & Details
Apr 2025 – Present	Engineer Bryza Co., Ltd. (Full-time) Dispatched to: Veriserve Co., Ltd.	Seconded to Veriserve Co., Ltd., assigned to Honda Motor's display audio verification and automation support project. • Maintain Display audio functional test in automation • Issue identification and resolution • Assure the quality control • Team-based progress management and report/documentation preparation Development Environment: Python, Excel, PowerPoint

■ Self-Introduction / Personal Statement

My greatest strength is my ability to focus carefully on each task while maintaining awareness of priorities and deadlines. In my current role, I work in a client-side environment that requires collaboration with external business partners, which has strengthened my teamwork and communication skills.

I also value taking the time to understand tasks accurately in order to avoid misunderstandings and ensure smooth execution. To improve efficiency, I actively organize and confirm information in advance, allowing me to work more effectively over time.

Going forward, I hope to challenge myself in AI- and cloud-related fields and grow as an engineer who can contribute to long-term product and system improvement.
